Smooth stalked meadow grass is generally characterized as the “concrete base” of your turf grass system. Thanks to its extraordinarily good wear tolerance the presence of this grass species is more than welcome in a turf mixture for sports.

**Characteristics**
- Wear tolerance
- Speed of establishment
- Fineness of leaves
- Self recovery capacity
- Fast green up after winter
- Colour darkness
- Tolerance to leaf spot
- Tolerance to rust
- Less irrigation required
- Less fertilizer required
- Less frequent mowing possible

**Application**
Barserati is a sport and lawn poa pratensis variety suitable for:
- Turf production
- Sport
  - Golf courses: tees and fairways
  - Football and rugby pitches
- General landscaping
- Lawns

**Barserati**

**The most drought and heat tolerant poa pratensis ever!**
- Extreme drought tolerance
- Extreme heat tolerance
- High rust resistance
- Broad application

Barserati is the best performing poa pratensis in heat and drought and has the best recovery after heat and drought stress.

**Colour and leaf texture**
Medium-dark green coloured with medium broad leaves.

**Partner varieties in mixtures**
Ask your Barenbrug supplier for the best solutions for your situation.
