Landscape & Lawn

Turf grass plays an important part in our lives. It grows in our gardens and parks. It is not only its use in practice that is important, but also its aesthetic and its ability to purify air and water. A carefully considered grass seed mixture will increase the pleasure you get from your ornamental lawn for many years.

Solide

Strong turf with high ornamental value

- Ideal for recreational areas and parks
- High ornamental value thanks to fine-leaf grass
- Fast recovery after damage to the sward
- High disease tolerance

Ideal for recreational areas and parks
Solide is characterised by a unique combination of wear tolerance and ornamental grass species, making the mixture ideal for both recreational areas and parks. It creates a strong, elegant lawn.

High ornamental value thanks to fine-leaf grass
The fine-leaf grass used in this mixture creates a very attractive lawn consisting of grass with a high ornamental value.

Fast recovery after damage to the sward
Any damage to the sward will recover quickly thanks to the unique combination of grass species. So children can play happily on a Solide lawn without having to worry about damaging the sward.

High disease tolerance
Being very resistant to common grass diseases, Solide grass will remain attractive with a much lower need for control products, implying a lower burden on the environment.
