

# La Paloma

## Bermuda grass

- Good winter resistance.
- Greens up quickly in spring.
- Stolon internode length.
- Shorter plant height

## Composition

100% Cynodon dactylon

## Cynodon dactylon

Cynodon dactylon - Bermuda grass. Bermuda grass produces a vigorous, deep-rooted and light to dark green, dense turf which is well adapted to most soils and grows the best in warm climates. Bermuda spreads by both rhizomes and stolons. It has excellent wear, drought, heat and salt tolerance, establishes quickly, produces lateral stems and is competitive against weeds.

- Atlantic climate
- Nordic climate
- Continental
- Mediterranean

## Characteristics

Speed of growth

Genetic color (rating from light to dark)

Tolerance to wear

Spring green up

Color retention in autumn

Leaf texture

Tolerance to fungi diseases
